

## Taking Incident Reporting to the next level

### Better visibility with Inrisys

Inrisys helps manage and analyze incidents. It empowers organizations with the necessary information to improve and ensure company-wide health and safety initiatives, and compliance.

### How can Inrisys help your organization?

- Captures a wide range of incidents via an easy 5-step wizard
- Alerts authorities of adverse events in real time
- Aligns with the ISO 31000 and ISO 45001 standards
- Minimizes losses due to uncontrolled critical deficiencies
- Reduces time-consuming, paper-based work
- Identifies crucial incidents and risks that require immediate action
- Responds to incidents at enterprise level in a timely and informative manner
- Takes corrective actions based on gathered data to mitigate risks
- Ensures corrective action addresses the root-cause and contains risks

### Workplace risks are real

#### The International Labor Organization reported

- **Every 15 seconds**, a worker dies from a work-related accident or disease\*
- **317 million accidents** occur on the job annually\*
- Economic burden of poor occupational health & safety practices is **4% of global Gross Domestic Product** each year\*

#### The US Bureau of Labor Statistics reported

- **4,836** fatal workplace injuries\*\*
- **16.9%** rate of non-fatal occupational illnesses\*\*
- **3,470,600** cases of non-fatal occupational injuries\*\*

\* International Labor Organization, 2014    \*\* US Bureau of Labor Statistics, 2015
